

## Facts about Palm Oil The Used in Part of highest yield The most Edible oil many compared the human widely-used from the products, diet for to other oil vegetable oil fruits of the because of thousands of in the world crops per oil palm tree its functional hectare of years benefits land Consists of almost equal Concentrated **Alternative** Easily Rich in amounts of to replace source of fits into a antioxidant saturated and energy for trans fatty balanced vitamin E unsaturated the body acids diet fatty acids Palm oil plantations which have been independently audited and certified against the Roundtable on Sustainable Palm Oil (RSPO) standard: preserve play an biodiversity positive element protect the important role and brings in the local agroenvironment, in providing the economic workers' rights, ecological system growing global benefits to local and the land even attracting demand for communities rights of local wildlife vegetable people oil

National Initiatives for Sustainable Palm Oil in Europe

- The European Palm Oil Alliance believes that sustainable palm oil is a key food ingredient to help feed the world, to help protect biodiversity and improve socio-economic development and overall contributes to achieving the United Nations' Sustainable Development Goals (UN SDGs).
- We will push for sustainable palm oil market transformation in Europe.
- We facilitate and support national industry alliances on sustainable palm oil in Europe to ensure a coordinated approach.
- We engage with European and national stakeholders as well as key organisations.
- We will create a positive image of palm oil used in food.
- We are supported by European vegetable oil refiners and by palm oil producing industry associations.
- All our members commit to supply certified sustainable palm oil (RSPO or equivalent) in Europe and support a fully traceable NDPE ('No Deforestation, No Peatland and No Exploitation') supply chain.
