Sustainable Palm Oil for Europe in 2020

RSPO, ISPO & MSPO PRODUCTION AREAS

certification covered 18% of the total global palm oil production area (23.5 Mha)

certification covered 42% of Indonesia's total palm oil production area (13.3 Mha)

certification covered 98% of Malaysia's total palm oil production area (5.2 Mha)

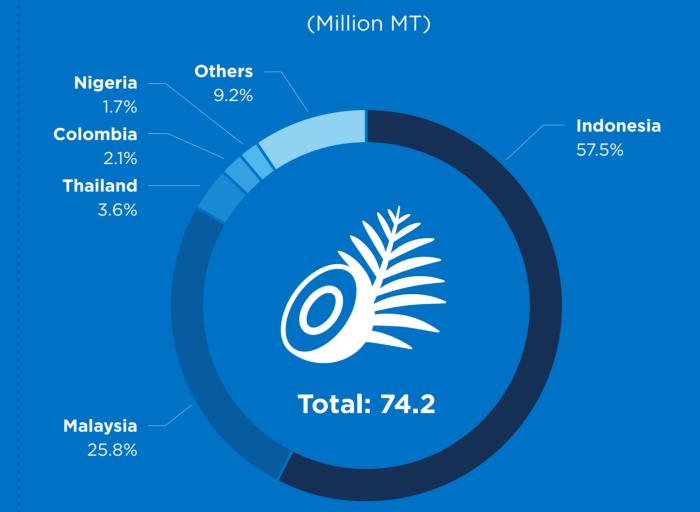

TRACEABILITY

to Mill by major European refiners

GLOBAL PALM OIL PRODUCTION

NDPE PROGRESS

of the volumes used by the major European refiners are covered by NDPE policies. All policies cover:

Free prior informed consent (FPIC) for indigenous and other local communities.

Preservation of High Conservation Value (HCV) areas, High Carbon Stock (HCS) areas and peatlands.

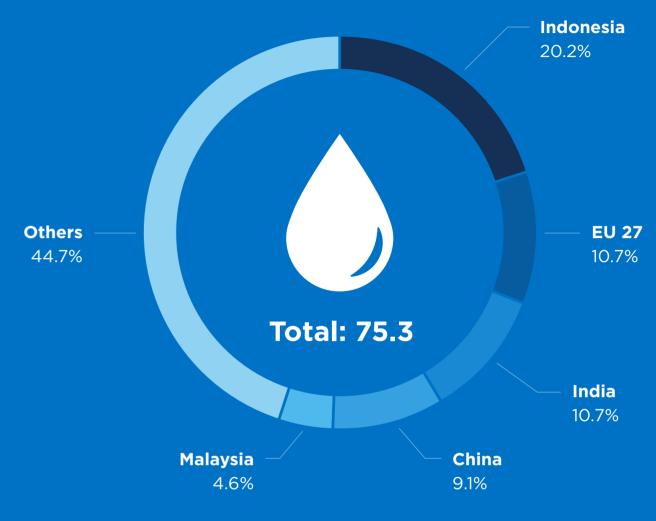

Prevention of poor working conditions.

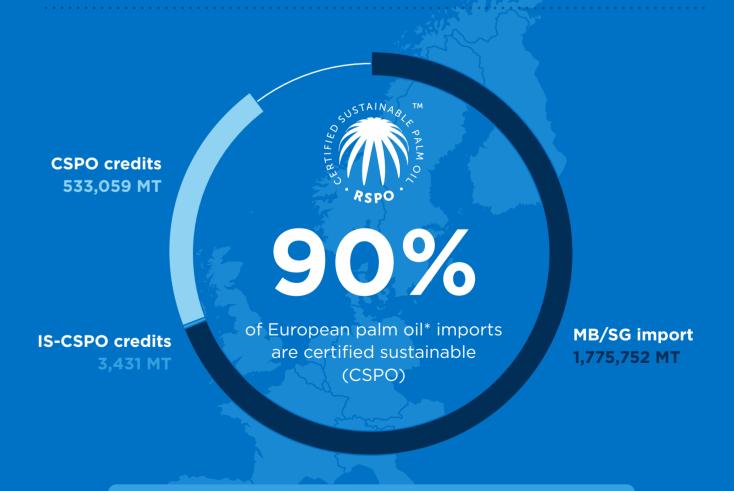

NDPE stands for No Deforestation, No Peat and No Exploitation

GLOBAL PALM OIL USAGE

(Million MT)

Besides the large individual users, there are 13 medium-using countries that used 18% of the total volume together.

The volume of sustainable palm oil imported to Europe has been stagnant since 2018

IS-CSPO refers to Independent Smallholder - Certified Sustainable Palm Oil

*This percentage only refers to palm oil used in food, feed and oleochemicals for EU27, United Kingdom, Norway & Switzerland. Palm oil used in biofuels has to meet the sustainability criteria of the European Renewable Energy Directive (RED) and is not included in this figure.
